

# ROBERT KIME

Our guide has been designed to help you choose the most suitable lampshade for your light.

## Lampshade Fitting Guide

### Candle Clip

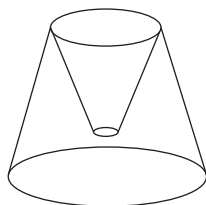

Often used for wall sconces or chandeliers, lampshades 7 inches or smaller can be equipped with a candle clip fitting which clips on to the lightbulb.

### Finial

Finial fittings are mainly used for the United States. They are designed to sit on a harp.

### Gimbal

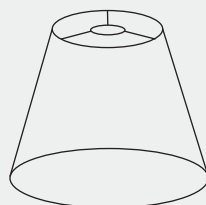

Used for table lamps or floor lamps that require a shade with a base diameter 12 inches or smaller, equipped with a BC or ES washer.

### Duplex

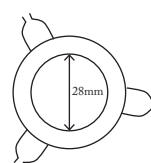

Used for table or floor lamps that require a shade with a base diameter 14 inches or larger and come supplied with a shade carrier. Possible to use with a spider adapter for the United States.

### Pendant

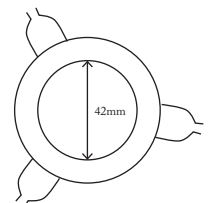

Often used on a light with the bulb facing down. Equipped with BC or ES washer.

### BC or ES Standard Washers

BC Bayonet Cap  
28mm internal diameter

ES Edison Screw  
42mm internal diameter.

These washers surround the bulb holder and are part of a gimble fitting, pendant fitting and a shade carrier. ES washers can be used in the United States in conjunction with an Uno shade ring adapter.
