ACORN FINIAL IN OAK

CPAFO-X

Robert Kime Curtain Poles are based on document examples from the Robert Kime archive and are a classic approach to hanging curtains.

Our Curtain Pole system is a group of 4 elements - Pole, Brackets, Rings and Finials. Each element comes in three different sizes to accommodate either a 1.5", 2.0" or 2.5" curtain pole. Finials and rings are also available in three different sizes and are supplied in a 0.5" size larger than the pole diameter.

Oak finials are available in an Acorn or Ball finial style.

The largest single run of curtain pole available is 2.6m due to shipping constraints, but longer runs are accommodated using our complimentary proprietary joining system.

The oak finish on our curtain poles and accessories was specifically designed for Robert, who looked for 'the hand' or

'the touch' in all products, resulting in the finish you see today. Our curtain poles and accessories are also available in an antiqued brass finish, which is applied by hand and will continue to age and develop patina over time.
