PICTURE RAIL - ANTIQUE BRASS

PR009B

Robert Kime Picture Railing is based on a document example from the Robert Kime archive and is a classic approach to hanging art in a room.

Our Picture Railing is a group of 6 elements - Rail, Ball end, Backplate (2 options) , Bracket, S Hook and Chain (3 options).

The picture rail itself is 0.88" / 22mm in diameter.

The largest single run of picture rail available is 2.6 m (due to shipping constraints), but longer runs are accommodated using our complimentary proprietary joining system.

All elements of our Picture Railing come in our signature hand-coloured antique brass.

Please see Useful Product Information for important details.

Material: Brass
Width: 2.2 cm (0.88 in)
